

BioRx: The Clear Alpha-1 Solution

Why BioRx?

As a national provider of specialized medications, BioRx is experienced in all aspects of providing services to chronic and long-term therapy patients.

Alpha-1 Augmentation Therapy

BioRx is an authorized distributor of two FDA-approved treatments for alpha-1 antitrypsin (AAT) deficiency – ARALAST NP and GLASSIA.

ARALAST NP is a similar product to its established predecessor, ARALAST, containing the same active components of plasma a1-PI, with identical formulations.

GLASSIA, the newest FDA-approved treatment for AAT deficiency, is unique among alpha-1 augmentation therapies. GLASSIA comes in a ready-to-use liquid formulation that does not require reconstitution, providing added convenience for patients, caregivers and clinical staff.

As an authorized distributor of both ARALAST NP and GLASSIA, BioRx is here to provide expert pharmacy and home infusion service to your office staff and patients.

Financial Considerations

Alpha-1 augmentation therapy is expensive. At BioRx, we purchase and dispense the drug and bill the patient's insurance directly – thereby eliminating the need for your office to carry costly accounts receivable balances.

Reimbursement Services

Whether fighting for an insurance authorization, submitting patients' claims, or fighting a medical necessity denial, experienced reimbursement personnel stand ready to navigate the reimbursement maze.

Specialized Nursing

- “Start to finish” in-home nursing, caregiver venipuncture training, and drug administration customized to the family’s situation
- Nurses highly trained in the administration of both ARALAST NP and GLASSIA
- Personalized treatment plans based on the physician’s specific nursing and care plan orders

We’ve Got You Covered

- Complete patient insurance verification and authorization for commercial and government payer plans
- Experienced clinical staff
- Access to BioRx staff 365 days a year, 24 hours a day
- Patient education and training resources
- Customized orders based on patient preferences and medical needs

Here for You

At BioRx, customer service is delivered through its Alpha-1 Solutions program. Each patient with AAT deficiency is considered a consumer requiring individual attention and consideration. That is why a BioRx Alpha-1 Solutions Advisor is assigned to each consumer to ensure both patient and caregiver satisfaction.

Our alpha-1 advisors provide direct, one-on-one coordination of care between your office and patients.

About BioRx

Based in Cincinnati, OH, BioRx is a national pharmacy specializing in biological agents and other blood fractions, including treatments for AAT deficiency. As one of the nation's fastest growing providers of blood fractions and other specialty pharmaceuticals, the company's clinical staff reaches patients and physicians in all 50 states.

Customer Service

We provide a comprehensive, highly specialized service model designed to accommodate the needs of alpha-1 patients and caregivers. With BioRx, you will never have to wait to get the information and support you need!
